

REMEMBER WHEN RAIN MADE YOU HAPPY?

RainPro's new Design Series gutters just may reawaken that feeling. Because RainPro™ is the gutter system that gives your home added beauty, and you, real peace of mind.

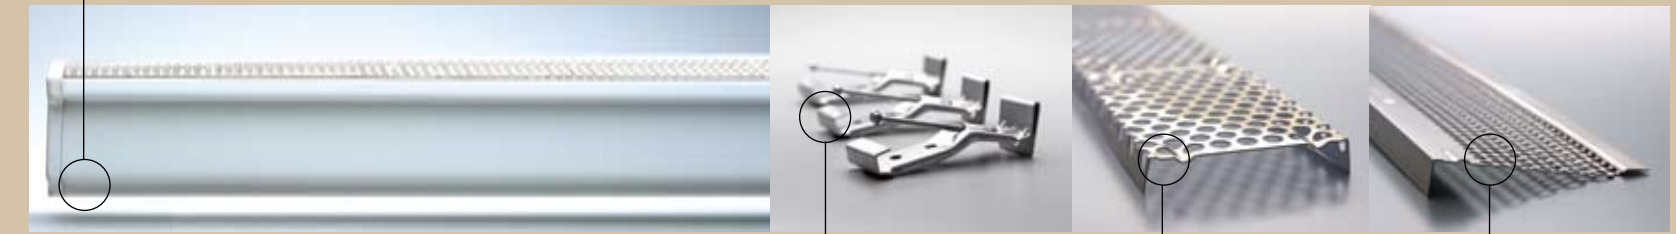

The key to RainPro's uniqueness is that it is a large capacity gutter system that creates maximum water flow, without looking large. With more water flow, RainPro gives your home ultimate protection *and* real curb appeal.

RainPro's unique architectural styling was designed to complement the look of today's homes without having to resort to a bulky looking gutter system. You'll love the way your house looks with RainPro gutters, and how good you'll feel. Especially when it rains.

Better Design	Each component of the RainPro gutter system, from the miters and end caps to the hidden hangers, was designed to achieve a totally refined look. RainPro's unique architectural profile looks like part of your house, and not something that was added on.
Custom Fit	All RainPro gutters are seamless. They are custom formed and cut to exact dimensions <i>at your home</i> to ensure a perfect fit.
Maximum Flow	Compared to standard gutters, RainPro has a larger gutter bottom and downspout, which helps remove rainwater from your roof faster, to better protect your home.
Maximum Strength	RainPro gutter systems are made from a heavier gauge aluminum for added strength, and are 18.5% thicker than standard gutters.
Color Choices	Searching for that special color to complement your home? RainPro is available in a wide range of designer colors.
ScratchGuard™ Finish	The RainPro gutter system is protected by Englert's exclusive ScratchGuard paint finish, and comes with a limited lifetime warranty.

RainPro's wider gutter bottom and larger 3 3/8" outlet together give you a dramatic increase in water flow capacity over a standard gutter and outlet.

Heavy-duty internal gutter hangers give your gutter system maximum strength and durability, yet are totally concealed from view.

If leaf protection is required, RainPro can be fitted with Englert's unique patented dual-filtration system, Gutter Tunnel™, without altering the look of the gutter.

RainPro is available in these designer colors*:
